# V U C A

## **VOLATILITY**

Equity, bond and currency market volatility; the lack of stability and predictability.

## **UNCERTAINTY**

The potential change in the inflation index calculation, the potential switch to "smoothing" for pension funds calculating their recovery plan; the lack of ability to foresee what major changes might come.

## **COMPLEXITY**

In understanding these financial markets in the era of the "new normal". The proliferation and increasing complexity of new financial instruments and regulation to deal with increasingly complex markets, moving in ways experts have never seen before.

## **AMBIGUITY**

The resulting feeling. Is this the great rotation from bonds to equities? Or will bond yields stay low for longer? What is the best course of action?
